Botometer X

An OSoMe project (bot•o•meter)

Botometer X (formerly Botometer) is currently in archival mode, and the results were pre-calculated based on historical data collected before May 31, 2023. Botometer X will not return any results for accounts created after the data cutoff. For accounts created before the data cutoff, Botometer X only has the records for some of them. If these accounts are queried, Botometer X will return the bot scores and corresponding timestamps. The scores are numbers between 0 and 5, calculated using the BotometerLite model. Higher scores mean more bot-like activity. For details, please refer to the [FAQ](#) page.

You can also fetch the bot scores in batch through the API. For details, please refer to our [API](#) page.

# Features

- Free, no login required
- Support both username and user ID
- **Archive mode**
  - Over 1 billion pre-calculated bot scores based on BotometerLite model and historical data before June 2023
  - Incomplete data: no records of accounts created after May 31, 2023; no records for some accounts created before May 31, 2023
  - Data outdated
  - Possibly multiple records for one username (e.g., @MondalShreema)
- **Use at your discretion**

# Demos

# API

- Rate limit
  - At most 100 accounts per query
  - Prioritize user IDs
- Pricing
